

Instituto Nacional de Salud Publica (INSP) Cuernavaca, Mexico

Projects can be tailored to students' interests including Nutrition, Migration, HIV or other Public Health Issues and Initiatives

The mission of the INSP is to contribute to social equity and the full realization of the right to health protection through the generation and dissemination of knowledge, state-of-the-art training of human resources, and innovation in multidisciplinary research in order to develop evidence-based public policies. As a leader in integral public health research and teaching in Latin America, the INSP strives to generate precise and current reference knowledge for the formulation, implementation and evaluation of health research policy on national and regional levels.

Student Responsibilities will vary depending on the project and can include database analysis, field work in their own campaigns or projects, and survey analysis.
