

# University of Limerick, Ireland

## **Project: What is the Best Neurodevelopmental follow-up Model for High-Risk Preterm Newborns Delivered in Limerick County?**

We are seeking to recruit a Public Health Intern with excellent organization, communication, and interpersonal skills to promote and facilitate the conduct of this research. This intern will be expected to have knowledge of health interventions, health outcomes, and healthcare delivery and utilization in High-Risk preterm newborns.

### **Student Responsibilities:**

#### **Research Implementation**

- Contribute to research programs for High-Risk Preterm under the general guidance of the PI.
- Determine appropriate methodologies for research, with advice and support as required.
- Assess research findings for the need for further investigations.
- Transfer knowledge of advances in the subject area into research activity.

#### **Research Management**

- Plan, coordinate, and implement research
- Manage personal and research resources appropriately.

#### **Research Outputs – Write-Up and Dissemination**

- Write up results from personal research activity.
- Contribute to research dissemination (e.g., reports, papers, presentations, etc.).
- Present information on research progress and outcomes

### **Student Characteristics and Eligibility:**

Graduate Student with knowledge and understanding of the policy, practices and procedures relevant to the role, including Research Ethics, Knowledge Transfer, Health and Safety, Equal Opportunities & Diversity as well as understanding of data protection and confidentiality requirements.

### **Length of Program:**

**Approximately 8 weeks during Summer 2023**
