# University of Limerick, Ireland

#### **Project: Ageing Research at the University of Limerick**

The Ageing Research Centre (ARC) is affiliated with the Health Research Institute (HRI) at the University of Limerick. The HRI has developed a unique transdisciplinary approach to health research, focusing on translational outputs with direct relevance to health practice, and delivering research excellence and impact in the health domain through a vibrant membership and supportive ecosystem. The ARC has a program of current activity focused around three thematic areas:

- Aligning health services to the needs of older people.
- Ageing in place.
- Using health analytics to optimize outcomes for older people.

#### **Student Responsibilities:**

- Contribute to research programs for older adults under general guidance of the PI.
- Determine appropriate methodologies for research, with advice and support as appropriate.
- Assess research findings for the need/scope for further investigations.
- Translate knowledge of advances in the subject area into research activity.
- Plan, co-ordinate and implement research.
- Manage own personal and research resources appropriately.
- Write up results from own research activity.
- Contribute to research dissemination (e.g. reports, papers, presentations etc).
- Present information on research progress and outcomes
